EDGEHALT® POSI-STOP LADDER SAFETY GATES (LSGPS & LSGPSD)

The Safest Safety Gates

The new patent-pending EdgeHalt Posi-Stop Ladder Safety Gate and the Posi-Stop Double Ladder Safety Gate are the safest safety gates on the market. They have been tested to meet or exceed OSHA, ANSI and Canadian COHS standards. Plus, they feature innovative Slam-Proof® technology to close the gate in a quiet, controlled manner. Posi-Stop Ladder Safety Gates are the perfect solution when you don't have a regular railing or surface for a strike plate to stop or rest in place against, while Posi-Stop Double Ladder Safety Gates are ideal for applications that require an adjustable paired gate where side room is limited and the swing area of the gate needs to be minimized.

Slam-Proof® Technology - A unique damping system that provides safety to the operator while the gate is closing.

Meets Or Exceeds OSHA / ANSI / Canadian COHS Standards - Proven safety for your team (OSHA 1910.29; OSHA 1910.28; ANSI A1264.1-2017; Canadian COHS SOR-86-304 Part II; ANSI A14.3).

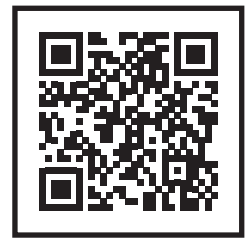

Springs Guaranteed For Life Of Gate - Tested to exceed more than one million cycles, you can feel good that the springs on your gate will likely outlast everything around them.

Adjustable For Easy Installation - 10 inches of adjustability make it simpler to install in different openings around your facility.

Always In Place - Self-closing to protect employees from dangerous falls.

Save On Shipping - The gate's unique design allows for a compact shipping box, reducing shipping costs by an average of \$8-\$18+ per gate.

*Limited to stock on hand

EDGEHALT®

Posi-Stop Ladder Safety Gate

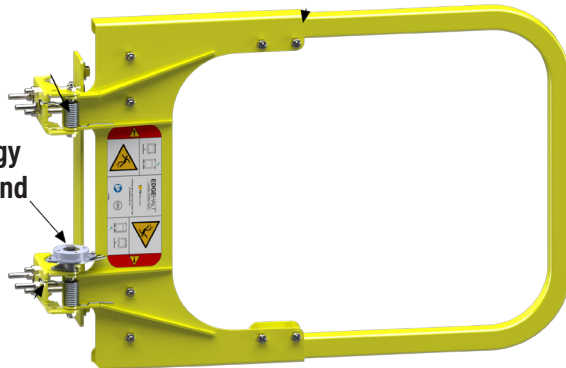

Scan for Measuring Guide & Order Form

1-Million+ cycle tested springs, guaranteed for the life of the gate

Wide range of adjustability, up to 10" per gate, only (2) SKUs for 15" to 50"

Meets or exceeds the testing standards for OSHA, ANSI and Canadian COHS standards

Slam-Proof® Technology creating a controlled and soft close

Unique gate design with patents pending

Adjustable spring torque, allowing adjustability on how fast the gate closes

Compact box design saving customers \$8-\$18+ per gate on shipping

Available in 3 Finishes - Powder Coat Yellow (PCY), Hot-Dipped Galvanized (GAL), 304 Stainless Steel Seal Welded (304SW)

EDGEHALT®

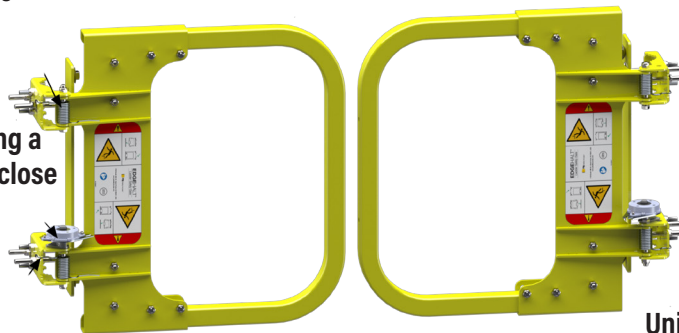

Posi-Stop Double Ladder Safety Gate

1-Million+ cycle tested springs, guaranteed for the life of the gate

Wide range of adjustability, up to 10" per gate, only (3) SKUs for 20" to 60"

Meets or exceeds the testing standards for OSHA, ANSI and Canadian COHS standards

Slam-Proof® Technology creating a controlled and soft close
